

# String and M-Theory: The New Geometry of the 21st Century – II

## 29 November–3 December 2021

### Conference speakers

Meer Ashwinkumar (Kavli Institute for the Physics and Mathematics of the Universe, Japan)  
David Berman (Queen Mary University of London, UK)  
Sergei Gukov (California Institute of Technology, USA)  
Fei Han (National University of Singapore, Singapore)  
Chris Hull (Imperial College London, UK)  
Hyungrok Kim (The Maxwell Institute for Mathematical Sciences, UK)  
Georgios Korpas (Czech Technical University in Prague, Prague)  
Neil Lambert (King's College London, UK)  
Si Li (Tsinghua University, China)  
Ioana Coman Lohi (University of Amsterdam, Netherlands)  
Hisham Sati (New York University Abu Dhabi, United Arab Emirates)  
Sakura Schafer-Nameki (University of Oxford, UK)  
Urs Schreiber (New York University Abu Dhabi and Czech Academy of Sciences)  
Eric Sharpe (Virginia Tech, USA)  
Meng-Chwan Tan (National University of Singapore, Singapore)  
Alessandro Tanzini (Scuola Internazionale Superiore di Studi Avanzati, Italy)  
Richard Thomas (Imperial College London, UK)  
Mathai Varghese (University of Adelaide, Australia)  
Junya Yagi (Tsinghua University, China)  
Max Zimet (Harvard University, USA)

### Organizing committee

Meng-Chwan Tan (National University of Singapore, Singapore), Co-chair  
Fei Han (National University of Singapore, Singapore), Co-chair  
Neil Lambert (King's College London, UK)  
Christian Saemann (Heriot-Watt University, UK)  
Hisham Sati (New York University, UAE)  
Mathai Varghese (The University of Adelaide, Australia)  
Edward Witten (Institute for Advanced Study, USA)  
Shing-Tung Yau (Harvard University, USA)

Online event  
Registration required
